

No-Till Drill Rental Return Checklist

These items will be checked when drill is returned:

- Machine is clean, has been rinsed off
- Seed box is empty and clean
- Chains have been lubricated
- Check that tires are inflated on trailer and seed drill (50 psi for seed drill)
- Bolts, pins and fasteners are secure (A torque values chart is available on pg. 39 of operations manual)
- Check drill for worn or damaged parts
- Rotate both drive wheels to verify that drive and meters are working properly and free from foreign material.
- Ensure drill is adequately secured on trailer and straps have been returned
